Senior Service Delivery Manager | Network Operations | Global Telecommunications

PROFESSIONAL SUMMARY

Accomplished Senior Service Delivery Leader with extensive Network Operations experience in global telecommunications, subsea cable systems, backbone networks and data center environments. Proven track record managing end-to-end service delivery for 100+ enterprise and carrier customers, leading cross-functional teams across regions, and maintaining SLA performance above 99%. Strong expertise in SLA governance, incident and problem management, vendor management, and executive reporting, with a consistent focus on automation, AI implementation, process optimization, and customer satisfaction.

CORE SKILLS

Service Delivery Management | Customer Success & Stakeholder Management | Incident & Problem Management | Network Operations (Subsea & Backbone) | Data Center Environments | Enterprise & Carrier Customers | Vendor & Partner Management | Process Automation | Executive & Customer Reporting | SLA / OLA Management

PROFESSIONAL EXPERIENCE

Telxius USA, Miami, FL

August 2016 - January 2026

Senior Service Delivery Leader

Submarine Cable and Telecom infrastructure provider

- Led global Service Delivery governance across subsea, capacity and data center services for 100+ enterprise and international carriers and customers, ensuring consistent SLA compliance and high customer satisfaction.
- Managed end-to-end service delivery across multi-Gbps capacity services, continental and transatlantic routes and 50+ Points of Presence (PoPs) connecting the Americas and Europe.
- Coached and mentored a multidisciplinary team of 10+ Service Delivery professionals across multiple regions, improving collaboration, performance and service quality.
- Maintained SLA performance above 99% for mission-critical services, ensuring high availability and service reliability in complex backbone and subsea environments.
- Drove automation and process improvements that increased operational efficiency, improved response and resolution times, and reduced incident volumes by 80%.
- Prepared and delivered regular customer and executive reporting, providing performance metrics, service insights and continuous improvement plans.
- Coordinated with 50+ global vendors and partners supporting multi-region telecom infrastructure, managing escalations and ensuring contractual and service-level compliance.

Telefónica Global Solutions, Miami, FL

January 2008 - August 2016

Network Development Provisioning Manager

Global Capacity and IP services provider

- Managed network development and provisioning activities across multiple global Points of Presence (PoPs) serving enterprise and carrier customers.
- Planned, allocated and optimized space, power and connectivity within data center environments to support network growth and new services.
- Coordinated installations, service activations, maintenance windows and network upgrades with cross-functional technical, operations and vendor teams, minimizing customer impact.

Energia (Telefónica Affiliate), Lima, Peru

January 2000 - December 2008

NOC Supervisor - SAM-1 Submarine Cable System

- Supervised Network Operations Center activities for the SAM-1 Submarine Cable System.
- Supported the operation of a 16,000-mile undersea fiber-optic cable system across Latin America, ensuring network availability and performance.
